

POLICY & LEGISLATION

Sit at the table where AI rules are being written.

Core, Premium, and Patron members are invited into ongoing discussions and working groups that draft and refine public policy proposals affecting the AI industry — research integrity, high-risk systems, innovation, and the conditions under which labs, startups, and researchers can build. The Network publishes open drafts for comment. Members review language, bring field experience, and help shape standards before they harden into law. This is how practitioners stay inside the conversation that will define their work.

MEMBERSHIP TIERS

CORE MEMBER

- Digital access to AI Research Journal
- Official Network Member Badge
- Directory listing with photo and organization
- Member discussions and event RSVPs
- Open preprint publishing pathway

PREMIUM MEMBER

- Everything in Core
- Priority registration for events and webinars
- Print copy of AI Research Journal
- Discounted exhibitor booth rates
- Priority consideration for speaking
- 20% off consulting and workshops
- Promotional support at Network events

PATRON MEMBER

- Everything in Premium
- Featured directory and website placement
- 1 complimentary booth and speaking slot
- Free marketing support for events
- 30% off consulting and services
- Direct input on Network initiatives
- A seat in policy and legislation working groups
- Free ad page in AI Research Journal

AI ETHICS NETWORK

Membership

OUR MISSION

The mission of the AI Ethics Network is to ensure the safe and flourishing development of artificial intelligence, serving as humanity's catalyst to extend consciousness beyond Earth and dramatically expand human longevity.

01 Conferences, job fairs & competitions

High-signal conferences, recruiter tables, and pitch platforms that put researchers next to builders and hiring teams. Premium members receive priority registration, discounted exhibitor rates, and consideration for speaking. Patron members receive one complimentary booth and one complimentary speaking slot.

- Annual and regional conference track
- Job fairs and recruiter tables
- Competitions and pitch platforms
- Discounted or complimentary booths by tier

02 Open preprints & peer-reviewed journals

Publish early, then stand up to review. The Network hosts open preprint publishing and peer-reviewed journals — including AI Research Journal and AI Mathematics Journal — with a printed annual edition available to partners.

- Open preprint pathway
- AI Research Journal (peer-reviewed)
- AI Mathematics Journal (peer-reviewed)
- Partner ad page and printed annual issue

03 Social networking events

Mixers, receptions, and member-only gatherings built for conversation, not a badge scan line. Meet collaborators, patrons, interns, and labs in rooms designed for people to stay.

- Member-only discussions and mixers
- Receptions around conferences
- Introductions across research and industry
- Promotional support when you host or speak
